

PREVENT

350 g.

In most of Northern Europe we experience long periods with humid weather and muddy fields. This leads to our horses often suffering from sensitive and irritated skin, especially around the pastern. The irritation stems from the bacteria and mites living in the mud. In some cases, these bacteria and mites will infect the skin and cause what is normally referred to as grease heels. The moisture, bacteria and mites also affect the hooves, and plays a big part in developing thrush.

Both conditions may cause soreness and lameness.

WHY PREVENT?

PREVENT is manufactured in Denmark, and is one of the only powder-based products on the market. PREVENT is especially well-suited to prevent thrush, grease heels and other bacteria- and fungus-like afflictions.

The advantage of choosing a powder versus an ointment or a fluid, is that the powder dries up and lifts the moisture out of the afflicted area. Hereby creating a dry environment where bacteria and mites can't thrive.

With PREVENT you're ensuring the afflicted area stays dry for as long as possible, thus eliminating the mites and bacteria.

PRODUCT DESCRIPTION:

PREVENT is a fine powder product designed to prevent grease heels, thrush and other bacteria- and fungus-like afflictions.

The product clings very well to moist and wet areas, which ensures it stays on and remains effective for a longer period.

PREVENT is a bacteria inhibitor and moisture absorbent, aiding in creating an environment where mites and bacteria can't survive.

PRODUCT PROPERTIES:

- Easy to apply
- No pain or discomfort for the horse
- Bacteria inhibitor and moisture absorbent
- Ideal for prevention and treatment
- Clings to the area for hours
- Able to absorb up to 100 times its own weight

INSTRUCTIONS:

Prevention: Wash legs and feet, so they are free of mud and dirt. Apply PREVENT at exposed areas around the fetlock and foot. It is recommended to apply a generous layer, so the product is clearly visible on the fetlock and foot. Let the product stay, it will fall off by itself later.

Treatment: Use the product once a day till the desired effect occurs.

INGREDIENTS:

Prevent is a mixture of dried, ground and burnt chalk, as well as slaked and ground mineral components.

STORAGE:

A dry, cool place, inaccessible to children.

FIRST AID:

Wash your hands after use.

IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. Rinse mouth.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Call a doctor/physician if you feel unwell.

The product can be corrosive in large amounts.
